Important Note
Please Read Carefully**Study Tips**

This product will provide you questions and answers along with detailed explanations carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions.

Go through the entire document at least twice so that you make sure that you are not missing anything.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at CramBible an update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to www.CramBible.com
2. Click on Member zone/Log in
3. The latest versions of all purchased products are download from here. Just click the links.

For most updates, it is enough just to print the new questions at the end of the new version, not the whole document.

Feedback

Feedback on specific questions should be send to web@CramBible.com. You should state: Exam number and version, question number, and login ID.

Our experts will answer your mail promptly.

THE TOTAL NUMBER OF QUESTIONS IS 146

QUESTION NO: 1 What integrates with the HP System Management Homepage to enable network administrators to maintain detailed server inventory and track historical configuration changes?

- A. Version Control Agents (VCA)
- B. HP Insight Diagnostics Online
- C. Array Configuration Utility (ACU)
- D. Open Services Event Manager (OSEM)

Answer: B

QUESTION NO: 2 Which HP StorageWorks MSA can connect up to four MSA30 SCSI enclosures, has no Fibre Channel interface and is designed as a foundation for future solutions to ensure maximum investment protection?

- A. MSA500
- B. MSA1000
- C. MSA1510i
- D. MSA1500cs

Answer: C

QUESTION NO: 3 Which memory type can detect and correct 4-bit errors in a single byte?

- A. Parity
- B. RAID memory
- C. Standard ECC
- D. Advanced ECC

Answer: B

QUESTION NO: 4 Click the Task button. Match the RAID levels with their functions. Answer & Explanation Correct Answer Explanations No more information available

Place each RAID level next to its function.

[place here]	maintains dual parity information distributed across all disk drives
[place here]	requires two physical writes for every logical write
[place here]	stripes data across all disk drives
[place here]	distributes single parity information across all disk drives

Place each RAID level next to its function.

RAID 6 (RAID ADG)	maintains dual parity information distributed across all disk drives
RAID 1+0	requires two physical writes for every logical write
RAID 0	stripes data across all disk drives
RAID 5	distributes single parity information across all disk drives

Answer: Pending. Send your suggestion to web@crambible.com

QUESTION NO: 5 If the MTBF of a single disk drive is 100,000 hours, what is the MTBF for an array of five of these disk drives configured with RAID 5?

- A. 20,000 hours
- B. 50,000 hours
- C. 100,000 hours
- D. 500,000 hours

Answer: A

QUESTION NO: 6 In dual-core processor technologies, which components are duplicated within the single physical processor chip?

- A. execution core and processor cache only
- B. processor cache and cache controller only
- C. execution core, processor cache, and cache controller only
- D. execution core, processor cache, cache controller, and bus interface

Answer: D

QUESTION NO: 7 When configuring the authorizations for the System Management Homepage (SMH) on a Linux server, what should the system manager do to allow access for the root user?

- A. Create a password for root in SMH.
- B. Add root to the administrators group in SMH.
- C. Import the password file from Linux into SMH.
- D. Enter the root username and password to log into SMH.

Answer: D

QUESTION NO: 8 What can be imported into the HP System Management Homepage to increase security?

- A. local server certificate
- B. encrypted password file
- C. Secure Shell (SSH) public key
- D. 128-bit RC4 encryption license

Answer: A

QUESTION NO: 9 From where does the PXE client download its boot image?

- A. from a TFTP server
- B. from a Linux file server share
- C. from a Windows file server share
- D. from the SQL Server or MSDE database
- E. from the eXpress share on the deployment server

Answer: A

QUESTION NO: 10 When must the DHCP server option 60 be set?

- A. when the PXE server is located on the deployment server
- B. when the TFTP server and the PXE client are separated by a network router
