Important Note
Please Read Carefully**Study Tips**

This product will provide you questions and answers along with detailed explanations carefully compiled and written by our experts. Try to understand the concepts behind the questions instead of cramming the questions.

Go through the entire document at least twice so that you make sure that you are not missing anything.

Latest Version

We are constantly reviewing our products. New material is added and old material is revised. Free updates are available for 90 days after the purchase. You should check your member zone at CramBible an update 3-4 days before the scheduled exam date.

Here is the procedure to get the latest version:

1. Go to www.CramBible.com
2. Click on Member zone/Log in
3. The latest versions of all purchased products are download from here. Just click the links.

For most updates, it is enough just to print the new questions at the end of the new version, not the whole document.

Feedback

Feedback on specific questions should be send to web@CramBible.com. You should state: Exam number and version, question number, and login ID.

Our experts will answer your mail promptly.

- D. The Availability Test Interval setup

Answer: A, B, D

QUESTION NO: 6 A sales order is created for an item; however, the requested delivery date cannot be met because the item is not available in inventory, and there are no inbound orders scheduled. What functions needs to be run to find out when the order can be delivered?

- A. Available-to-Promise
- B. Capable-to-Promise
- C. Order Processing
- D. Calculate Plan

Answer: B

QUESTION NO: 7 To set up a special sales price for an individual customer, the user must do which of the following?

- A. Create a record specifying a sales price for the customer in question in the Sales Price table.
- B. First assign the customer in question to a group and then set up a special price for this group.
- C. Create a record specifying a sales price for the customer in question in the item customer catalog.
- D. Update the price information on the Item Card.

Answer: A

QUESTION NO: 8 When suggesting a price on a sales line, the program uses the Best Price principle. The best price is defined as:

- A. The lowest possible price specified in the sales price table.
- B. The lowest possible price with the highest permissible line discount on the order date.

- C. The price that has the most predefined parameters that have to be fulfilled before a special price can be granted.
- D. The lowest possible price with the highest permissible line and invoice discount on the order date.

Answer: B

QUESTION NO: 9 If a customer does not request a delivery date for its orders, how does the program calculate the earliest delivery date for the orders?

- A. The program sets the shipment date equal to the system date.
- B. The program sets the shipment date equal to the current working date.
- C. The program sets the shipment date equal to the availability date.
- D. The program sets the shipment date equal to the planned delivery date.

Answer: B

QUESTION NO: 10 Which of the following statements are true of the Available to Promise (ATP) concept of the order promising feature? Choose the 2 that apply.

- A. It uses entries in the inventory reservation system.
- B. If no items are available in inventory and there are no orders scheduled, the program can calculate the earliest date that items can be available if they are produced, bought, or transferred from another location.
- C. The program performs the availability check of the uncommitted (unreserved) portion of a company's inventory in terms of planned production, purchase, transfers and sales returns.
- D. It includes capacity constraint issues in the calculation, and it may be integrated to production scheduling, manufacturing, transfer and purchase planning.

Answer: A, C

QUESTION NO: 11 How does the program calculate the Expected Receipt Date for the purchase orders, when the purchaser does not request a receipt date?

- A. Order Date + Lead Time Calculation
- B. Planned Shipment Date + Shipping Time
- C. Shipment Date + Outbound Warehouse Handling Time
- D. Planned Receipt Date + Inbound Warehouse Handling Time + Safety Lead Time

Answer: D

QUESTION NO: 12 When does the program notify the user that substitutes exist?

- A. When posting a sales order.
- B. When creating a sales order.
- C. When entering the number of an item that has substitutes on a sales line.
- D. When shipping goods.

Answer: C

QUESTION NO: 13 When setting up Sales Order Management, what must the user do to instruct the program to issue a warning when there are not enough items on inventory to fulfill a sales order?

- A. Place a check mark in the Stockout Warning field on the General tab of the Sales & Receivables Setup window.
- B. Select the Stockout Warning option on the Sales Order window.
- C. Select the Stockout Warning option on the Customer Card.
- D. The program always automatically warns a user about lack of items on inventory.

Answer: A

QUESTION NO: 14 On which of the following dates is the picking process finished, and the items shipped from the warehouse?

- A. Planned Delivery Date
- B. Planned Shipment Date
- C. Promised Delivery Date
- D. Shipment Date

Answer: B

QUESTION NO: 15 Before a purchase order is posted for an item, it is determined that a large sales order for the same item was placed after the creation of the purchase order. Using the Requisition Worksheet, what is the quickest way to change the purchase order to also cover the sale?

- A. In the Requisition worksheet, use the Calculate Plan function and then use the Carry Out Action Message function.
